Welding Safety

3M™ Speedglas™ Heavy Duty Backpack

Designed for heavy duty industrial applications

Versatile adjustability for comfortable and stable fit

Flame retardant* and durable

Comfortable and designed to be perceived as balanced when carried

Designed to minimize contact with the back to help with ventilation

*ISO 16321-1 §7.8 Resistance to ignition

Comfortable and Robust

Some welders prefer to wear a heavy duty PAPR Backpack, which holds the Powered Air Purifying Respirator (PAPR) flat against your back and can make it easier to move around some workspaces. The 3M™ Speedglas™ Heavy Duty Backpack aims to provide comfort, light weight, robustness, stability and good perceived balance. It is primarily designed for welding applications and the 3M™ Adflo PAPR, but suitable to use with several other PAPRs (e.g. 3M™ Versaflo™).

Scan this code to see how easy it is to adjust!

Technical Specifications	
Weight	415 g (0,9 lb)
Sizes	Chest circumference 75–130 cm
Backplate materials	Thermoplastic polyester elastomer (TPC-ET-CD)
Harness materialst	Polyamide / Polyester / EVA
Suitable for	Adflo / TR300 / 600 / 800

The Heavy Duty Backpack also works well with the 3M™ Versaflo™ PAPRs.

3M™ Versaflo™ TR300

3M™ Versaflo™ TR600
